ANNUAL REPORT

—OF—

THE SELECTMEN

—AND OTHER—

TOWN OFFICERS,

—OF THE TOWN OF—

DORCHESTER, N. H.,

—FOR THE—

Year Ending February 15, 1899.

////////////////////////////////////

CANAAN, N. H.:
REPORTER POWER PRINT
1899.

"Bradley Quality" MEANS

Best Materials, Thorough Manufacture, Perfect Mechanical Condition, Highest Agricultural Value., Resulting from 37 Years' Practical Experience in Factory and Field.

////////////////////

THE BEST MATERIALS are those selected for their crop producing powers and not for mere chemicle analysis or "comercial value."

THE THOROUGH MANUFACTURE of all our fertilizers, whatever the grade or brand, has been brought to the highest attainable point in all our works through the invention or adoption of the most perfect machinery and appliances that the ingenuity of man has devised.

THE MECHANICAL CONDITION of a fertilizer comprises the fineness or subdivision of its component parts, its dryness or friability, and the even distribution of each element of plant food

THE AGRICULTURAL VALUE of every fertilizer is dependent upon the degree of excellence attained in each of the above three cardinal points, and to the highest development of these factors is to be attributed the unparalled success of BRADLEY'S FERTILIZERS, resulting in the production of the highest crop-producing powers ever reached in any fertilizer.

In buying BRADLEY BRANDS you secure "BRADLEY QUALITY," and consequently the largest possible returns for the money.

AN OBJECT LESSON.

Last spring while making an advertising contract with the Bradley Fertilizer Co., Mr. Rogers offered me a bag of the grass and grain fertilizer if I would try it on my grass lands. After sewing all but one pailfull I decided to make a test of its effects and going on to a knoll which would not cut half a ton to the acre, I traveled over it hap hazared sowing the fertilizer as long as it lasted. As soon as the grass started, a darker green and more luxuriant growth distinctly marked my track, and as the season advanced this became more pronounced, and showed as far as the field could be seen. A heavy growth of red clover came up, and was so stout that it lodged in places, and good judges estimated that there was three or four times the quantity of grass where the fertilizer was sown. The field was seen by several, including John Fernald, B. E. Goss, and others, who will certify to the results shown. Although I had used Bradley's fertilizers for years, and had great faith in them, the result on the run out grass plat was more than a surprise to me.

C. O. BARNEY.

Report of School Board.

To the Citizens of Dorchester:

In presenting our annual report we beg to say we have been more than successful in securing good teachers. We were in hopes of having a longer term of school last year, but we had to open out the school in division No. 5, so we have had one more school on our hands the last year than years previous. Hoping we may be able to prolong the school the coming year, we remain your humble servants,

HERMAN L. POQUETT,	} School Board.
GEO. B. FELLOWS,	
EZRA J. GOSS.	

DIVISION No. 2.

Spring term of seven weeks was taught by Miss Gertrude L. Tormey of Canaan, N. H.

Fall term of nine weeks was taught by Miss Mary E. Woodbine of Medfield, Mass., and we cannot speak too highly of the school. She kept them at work early and late, and we must say the scholars in this district learned most wonderfully.

DIVISION No. 3.

This was formerly a union district, and the school is now conducted by the town of Groton. The pupils of this town in this division are provided for by paying a proportional part of the expense of the school in this district.

SCHOOL DISTRICT No. 4.

Spring term was taught by May L. Clough, with good results. Order good and progress all that could be required.

Fall term was taught by Mary B. Martin with good success. Miss Martin worked most earnestly for the good of the pupils and gave general satisfaction.

CHEEVER DIVISION No. 5.

Spring term of seven weeks was taught by Miss Bessie M. Foster of Wentworth. This was Miss Foster's first experience in

the schoolroom. In visiting this school we found Miss Foster laboring hard for the advancement of her pupils.

Fall term of nine weeks was taught by Miss Foster, who in striving to please spent much of her time looking after the numberless wants of her pupils, but on a whole we found that her pupils learned remarkably well owing to her earnest efforts and kindly ways.

DIVISION No. 8.

There is no schoolhouse in this division. The school is held in the house of Mr. Park. He receives his proportion of school money, the teacher is hired by him and he also boards the teacher, thereby prolonging the school about forty weeks a year.

DIVISION No. 10.

Spring and fall terms were taught by Mr. George J. Giguere of Canaan, N. H., and he has the ability to keep his pupils busy all of the time. The order in this school was most perfect.

NO. DORCHESTER DIVISION No. 13.

Spring term of eight weeks was taught by Miss Alice E. Hall, who is a model teacher, an earnest worker and one who is thorough in her methods of teaching, thereby giving entire satisfaction to all concerned

Fall term of eight weeks was taught by Miss Alice E. Hall, who is a model teacher, an earnest worker, and one who is thorough in her methods of teaching, thereby giving satisfaction to all concerned.

Fall term of eight weeks was taught by George E. Brown, of Wentworth. In visiting this school we found that we were very fortunate in securing the services of so competent a teacher, as Mr. Brown proved himself to be, being able and capable. He did good work in the school room, and gave the best of satisfaction.
